

# DDAY Framework Suite - Command Reference Sheet (v2025-11.2)

## Daily Operational Quick Use Guide for ChatGPT Enterprise

### Initialization Commands

Purpose	Command	Notes
Full boot	Initialize DDAY Framework Suite.	Loads all cores
Quick boot	Quick-init DDAY Suite; apply Professional v3.	Fast start
Analysis-only	Activate reasoning_core only.	Loads RF01-RF05
Voice-only	Activate behavioral_core only.	Loads tone protocols
Audit-only	Activate validation_reference; run integrity crosswalk.	QA verification

### Voice and Tone Controls

Setting	Command	Effect
Professional v3	Use DDAY Professional v3.	Formal, concise
Casual-Professional v1	Switch to Casual-Professional v1.	Conversational
Snapshot Tone	Apply BS[01-06]	Context-specific tone

### Analytical Frameworks

Framework	Command	Focus
RF01	Apply RF01 Foundational Reasoning.	Baseline logic
RF02	Apply RF02 Comparative Assessment.	Relative analysis
RF03	Apply RF03 Error-Decomposition.	Variance analysis
RF04	Apply RF04 Risk-Signal Validation.	Stress testing
RF05	Apply RF05 Credit Evaluation.	Creditworthiness

### Threshold and Depth Adjustments

Control	Command	Default
Deviation alert	Set deviation_alert ±10%.	±10%
Material variance	Set material_variance ≥5%.	≥5%
Tighten thresholds	Tighten thresholds to ±8% / 4%.	—
Depth mode	First-order effects only.	Second-order default

### Session Management

Action	Command	Purpose
Verify versions	Run light verification.	Weekly check
Full integrity	Run full verification.	Biannual audit
Re-initialize	Re-initialize DDAY Framework Suite.	Restore structure
Switch framework	Switch to [framework_name].	Context change
Close session	Conclude DDAY Session.	Compliance summary

**Core Operating Rhythm:** Start deliberately - Switch explicitly - End cleanly.

Maintain audit traceability, tone integrity, and reasoning fidelity across all sessions.
